

Prompt Processing LATISS data products

- Where to find info (past runs, collection names, templates, notes, etc):
<https://confluence.lsstcorp.org/display/DM/Prompt+Processing+with+AuxTel+Imaging+Survey+Data+2023>
 - Slack #auxtel-prompt-processing
- Pipeline: "prompt_prototype/pipelines/LATISS/ApPipe.yaml"
 - Basically, default *ap_pipe* and deepCoadd as templates
- Run automatically when on-sky LATISS data are taken
- Input data (except raw) are pulled from /repo/embargo
 - "LATISS/defaults" collection chain (LATISS/calib, refcats, skymaps) and LATISS/templates
- Output butler data products are pushed to /repo/embargo
 - Example collection: LATISS/prompt/output-2023-08-29/ApPipe/prompt-proto-service-00013
- APDB: usdf-prompt-processing.slac.stanford.edu (schema pp_apdb)
 - <https://confluence.lsstcorp.org/display/DM/Accessing+the+APDB+in+the+USDF>
