

# Finishing LDM-151

1. Preface
  2. Introduction
  3. Alert Production
  4. Calibration Products Pipeline
  5. Data Release Production
  6. Science Data Quality Assurance
  7. Data Access, the Science User Interface and Tools
  8. Algorithmic Components
  9. Software Primitives
  10. Meeting SRD Metrics
- Mostly fine.  
Need to address e.g. RHL's comments.  
Maybe merge preface and introduction.  
Add more concrete links to DMSR/DPDD?*
- Move to a separate document. Discuss its scope and name another time, but no S?V?D?Q?[AC]? in LDM-151.*
- Drop entirely, will be replaced by other documents already in progress (the current text hasn't been updated since ~FDR, and is largely worthless).*
- Needs work, but stays.*
- Move to a new document; may be a diagram rather than text?*
- New section: link to important pipelines and algorithmic components for each SRD metric.*
