# NSF Review: Pipelines Session

2017-05-10

- 2 hour 35 minute total. Expect ~half of that prepared talks remainder Q&A & discussion driven by panel.
- Pipeline overviews. Primarily, focus on the design of the pipelines as laid down in LDM-151, demonstrating how they enable us to meet the LSST science requirements.
  - Alert Production [20 minutes; Simon and/or Eric]
  - Data Release Production [20 minutes; Jim]
  - Calibration Products Production [10 minutes; Robert]
- Commissioning, verification & validation [15 minutes; Robert]  
Likely based on the material presented at the Jan 2017 Commissioning Review, but taking account the V&V plan, component test plans, etc..
- Cost & Schedule [15 minutes; John]  
Incl. progress to date, potential descopes.
