Introducing Lynda.com

lynda.com[®]
+
LinkedIn

Lynda.com is a trusted leader in video-based learning content

End-to-end
process

In-depth content
in short and
long forms

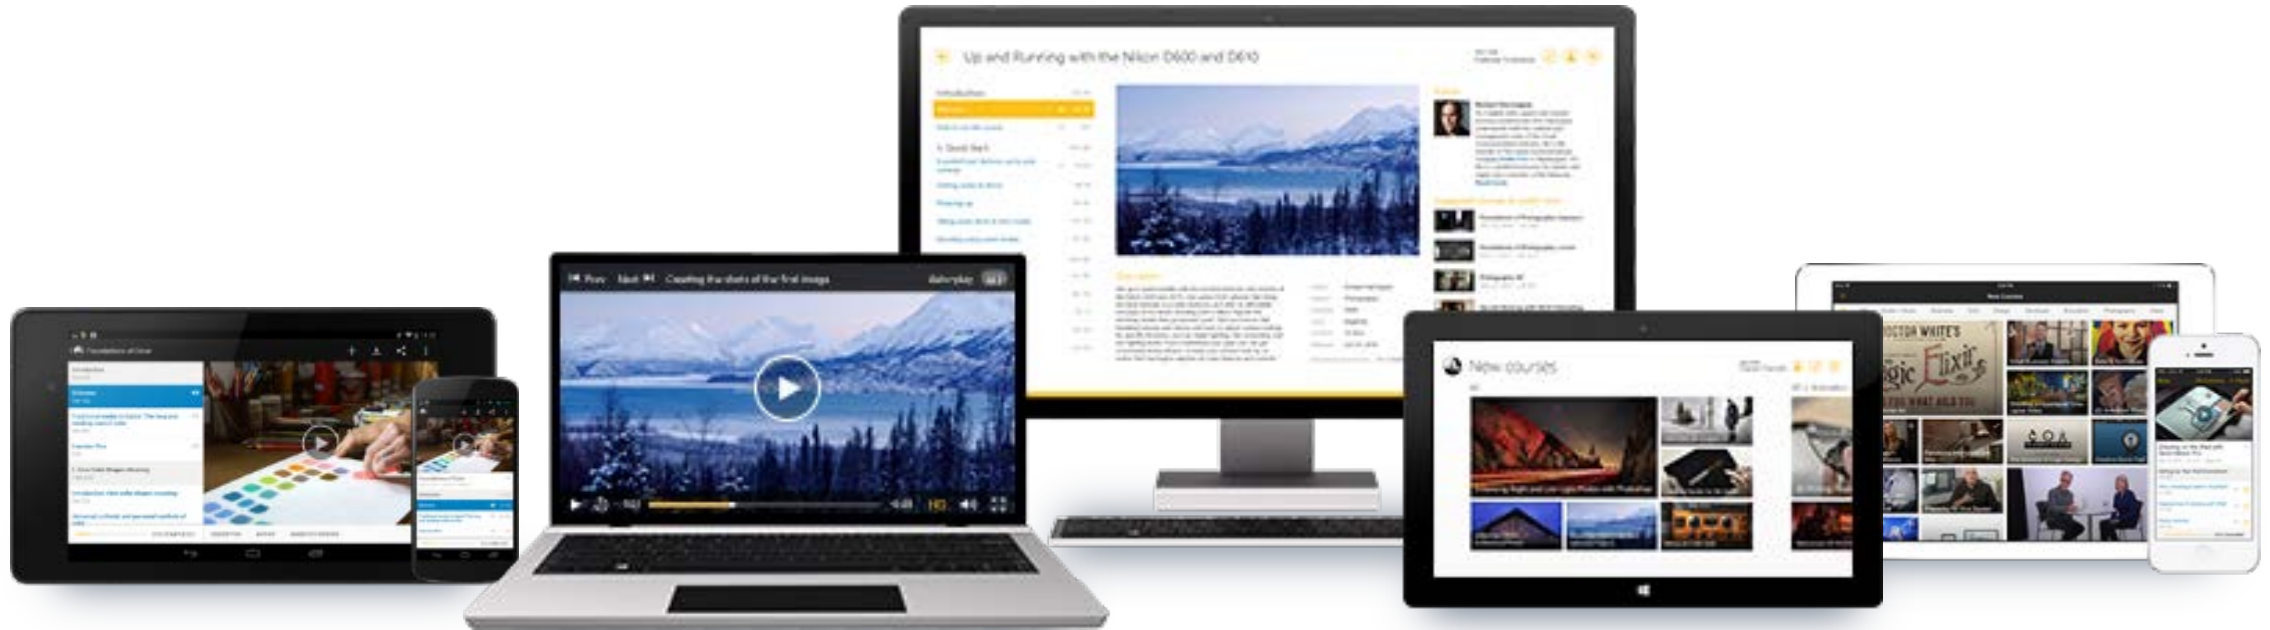

1800+
new courses
per year

10,000+
courses
overall

Learn Anytime, Anywhere

lynda.com is optimized for multiple devices and
is available online and offline

1,036 results for **earned value**

Sorted By : Best Match

VIDEO

▶ Understand **earned value** analysis (3m 39s)

From: Project Management Foundations

- [Voiceover] **Earned value** analysis evaluates how much a project has **earned** based on work that's been completed. In other words, a project **earns**...

VIDEO

▶ Using **earned value** (5m 12s)

From: Microsoft Project 2016 Essential Training

- **Earned value** analysis measures performance based on how much of the project cost you've **earned** by completing work. **Earned value** converts costs...

COURSE

Advanced Microsoft Project with Bonnie Biafore

Learn more advanced techniques for working with Microsoft Project 2010 and 2013, from reassigning resources and managing costs to customizing fields and reports.

▶ Understanding earned value analysis (4m 58s)

▶ Reviewing earned value with a visual report (3m 44s)

▶ Setting up a project to track earned value (3m 55s)

Calculating cost variance (CV) and
cost performance index (CPI)
3m 32s

Calculating cost variance (CV) and
cost performance index (CPI)
3m 9s

Forecasting estimate at completion
(EAC)
6m 38s

Forecasting estimate to completion
(ETC) and variance at completion
(VAC)
3m 13s

Predicting the future of the project
with the to-complete performance
index (TCPI)
4m 3s

Fence project EVM summary
2m 30s

3. Earned Value Example: System
Upgrade Project

Calculating BAC, PV, EV, and AC

Cost Performance Index (CPI)

$$\text{CPI} = \text{EV} / \text{AC}$$

Watch Now

EV Term	Value
EV	\$100
AC	\$400

Data Management Learning Path Example

Python and Big Data

- Python for Data Science Tips, Tricks, & Techniques
- Data Science Foundations: Python Scientific Stack
- Learning Python for Data Science, with Tim Fox
- Python for Data Science Essential Training
- Python: Data Analysis

Cloud/DevOps

- Cloud Architecture: Core Concepts
- DevOps Foundations: Continuous Delivery/Continuous Integration
- Cloud Architecture: Design Decisions
- Learning Cloud Computing: Serverless Computing

Workplace

- Writing Under a Deadline
- Interpersonal Communication
- Unconscious Bias
- Creating a High Performance Culture
- Creative Thinking

Presentations

- Learning Data Science: Tell Stories With Data
- Data Visualization: Storytelling
- Data Visualization: Best Practices

Coding

- Agile Development Practices
- Python: Programming Efficiently
- Programming Foundations: Discrete Mathematics
- Python: Design Patterns

EPO Learning Path Example

Python and Big Data

- Python for Data Science Tips, Tricks, & Techniques
- Data Science Foundations: Python Scientific Stack
- Learning Python for Data Science, with Tim Fox
- Python for Data Science Essential Training
- Python: Data Analysis
- Workplace
- Writing Under a Deadline
- Interpersonal Communication
- Unconscious Bias
- Creating a High Performance Culture
- Creative Thinking

Presentations

- Learning Data Science: Tell Stories With Data
- Data Visualization: Storytelling
- Data Visualization: Best Practices
- Communications
- Media Training
- Writing Press Releases
- Building an Online Community
- Developing a Style Guide

Telescope and Site Learning Path Example

Design

- Cert Prep: Certified SOLIDWORKS Professional
- Steel Building Design with SOLIDWORKS Weldments
- SOLIDWORKS Tips & Tricks
- Sketchbook Pro
- Rhino 5

Project Management

- Project Management: Government Projects
- Business Acumen for Project Managers
- Zoon Engineering: Project Management
- Agile Project Management

Management

- Managing contractors
- Negotiating in action
- Leading with Innovation
- Unconscious Bias

CAMs

- Calculating Earned Value
- Calculating cost variance (CV)
- Understand earned value analysis
- Understand earned value analysis

Systems Engineering Learning Path Example

Design

- Universal Principles of Design
- Mental Models
- Modularity
- Scaling Fallacy
- The Paradox of Unanimity

Project Management

- Project Management: Government Projects
- Business Acumen for Project Managers
- Zoon Engineering: Project Management
- Agile Project Management

Python and Big Data

- Python for Data Science Tips, Tricks, & Techniques
- Data Science Foundations: Python Scientific Stack
- Learning Python for Data Science, with Tim Fox and Elephant Scale
- Python for Data Science Essential Training
- Python: Data Analysis

CAMs

- Calculating Earned Value
- Calculating cost variance (CV)
- Understand earned value analysis
- Understand earned value analysis

Project Office Learning Path Example

Admin and Support Staff

- Microsoft Office suite
- Business etiquette
- Note-taking for business professionals
- Communication
- Being assertive

IT/Librarian

- Learning Linux Shell Scripting
- Powershell 5 Essential Training
- Debugging Scripts
- Learning Information Governance

Design

- Design Skills
- Illustration
- Design Techniques
- Page Layout
- Digital Painting
- Drawing
- Typography
- Digital Publishing
- Documentaries
- Print Design

So, What's Next?

- **Lynda and Litmos exist separately**
 - Litmos= LSST-specific, built in-house
 - Lynda= Amazon/Netflix style results
- **You will receive an email with a link to activate your Lynda.com account or an email with instructions on how to access your institution's instance of Lynda**
- **Training will work with the project to curate videos you may find helpful**
- **Let us know what you think**

Litmos
by CallidusCloud

- Always reach me at:
 - cmontgomery@lsst.org
