

# DM Stack Package History

This page records the inter-package history of the LSST DM stack packages, including package renames, retirements, additions, and code transfers. Intra-package changes are maintained in the git logs.

Note that official recordkeeping began April 2015; records prior to that date are incomplete.

Date (s)	Issue(s)	Origin Package	Destination Package	Operation	Notes
2015 /08	<a href="#">DM-1674</a> - Data ingest scripts cleanup <span>DONE</span>	datarel	daf_ingest	Code Transfer	The source ingestion task was moved to daf_ingest as part of a generalization and rename.
2014 /10/16	<a href="#">DM-1284</a> - rename meas_multifit to meas_modelfit, and add to lsst_apps <span>DONE</span>	meas_multifit	meas_modelfit	Package Rename	Name changed to better reflect package contents.
2013 /11 - 2015 /03	<a href="#">DM-146</a> - Move existing algorithms from meas_algorithms to meas_base and refactor to the new API <span>DONE</span> <a href="#">DM-1488</a> - Measurement - Convert Old Algorithms <span>DONE</span>	meas_algorithms	meas_base	Code Transfer	As part of the measurement framework rewrite, the standard suite of measurement algorithms was moved from meas_algorithms to meas_base.
2016 /10/10	<a href="#">DM-7915</a> - Rename daf_butlerUtils to obs_base <span>DONE</span>	daf_butlerUtils	obs_base	Package Rename	Name changed to better reflect package purpose.
2019 /04/30	<a href="#">DM-18490</a> - Move TimingMetricTask to verify <span>DONE</span>	ap_verify	verify	Code Transfer	TimingMetricTask moved to lsst.verify, a more appropriate location for generic code.
2019 /11/20	<a href="#">DM-22039</a> - Rename dax_ppdb to dax_apdb together with all dependencies <span>DONE</span>	dax_ppdb	dax_apdb	Package Rename	<a href="#">RFC-642</a> - Rename dax_ppdb to dax_apdb (and PPDB to APDB in general) <span>IMPLEMENTED</span>
