Notes

- No travel requests submitted for DESC?
 - Status of DM-SAWG discussion?
 - Will be happening as far as we know.
 - Andres making TR today.
- [Unknown User \(aguyonnet\)](#)
 - Status of paper.
 - Last time we spoke, expecting it to be ready for submission in February.
 - Recall it will have to go through the LSST publication process.
 - Working on the abstract now.
 - Giving an invited talk on BF for Euclid next week.
 - Still painfully downloading MERRA data; hopefully done today.
- [Andrés Alejandro Plazas Malagón](#)
 - Progress with identifying defects?

 [DM-17490](#) - Jira project doesn't exist or you don't have permission to view it.

 - Merlin helped with getting TS8 data.
 - Took quite a while, but was useful.
 - A lot of introduction to the stack and how this works.
 - Took a first pass through identifying bright pixels in a master dark.
 - Next step to look at cold pixels on a flat field.
 - Then compare to what Jim Chiang is doing in eotest.
 - Did we make progress with the old TS3 data / astro_metadata_translator? Any tickets filed? (We agreed to ticket and put this on the back-burner last week).
 - Yes, Tim J. has been dealing with this.
 - Apparently there is a secret Slack chat involving Merlin and others regarding which data sources should be supported in future, do we support "vendor data", etc.
 - SAWG interactions / giant table updates?
 - Further meeting this week.
- [Merlin Fisher-Levine](#)
 - There is still no todo list on

 [DM-16699](#) - Jira project doesn't exist or you don't have permission to view it. ?!

 - But did write a bunch of code.
 - Expecting to have a zeroth-order pipeline in 1.5 weeks.
 - Would like timeline for good quality biases, darks, arc-lamp spectra from the lab.
 - Need to know details of the arc lamp in use as well.
