| AOB | <ul><li>RFC status "BOARD RECOMMENDED" is still needed?</li><li>Are risks to be discussed by the DMCCB?</li></ul> | <ul><li>John Swinbank suggest to have an intermediate state in any case. For documents we don't need implementation tikets. Kian-Tat Lim Board recommended means the CCB approved it, but there are still no triggered issues.<ul><li>☑ Unknown User (gcomoretto) to update the dev guide: DMCCB approve RFCs setting the status to "BOARD RECOMMENDED"; the RFC status is set to ADOPTED once triggering issues have been opened, RFC for the approval of baselined documents do not require triggering issues, and can be set to adopted immediately.</li></ul></li><li>Proposal to discussing in the DMCCB risks due soon (in 45 days). This may bring up lots of riscks to discuss. Tim Jenness suggest to add these events to P6. Wil O'Mullane related the rick to the milestone.<ul><li>Discussion on retiring risks that will not be possible to mitigate, like "Adherence to coding standard", that will be difficult to get resources to resolve it.</li></ul></li><li>Kian-Tat Lim ask where the scripts to generate the list are: in lsst-sqre/sqre-jirakit</li></ul> |
