

# Dax Co-work 2019-09-18 Meeting notes

## Date

18 Sep 2019

## Attendees

- [Unknown User \(npease\)](#)
- [Fritz Mueller](#)
- [Andy Salnikov](#)
- [Kian-Tat Lim](#)
- [John Gates](#)
- [Igor Gaponenko](#)
- [Hsin-Fang Chiang](#)
- [Kenny Lo](#)
- [Andy Hanushevsky](#)
- [Unknown User \(cbanek\)](#)
- [Fabrice Jammes](#)
- [Colin Slater](#)
- [Joanne Bogart](#)

## Goals

## Discussion items

Time	Item	Who	Notes
	Problems with SELECT * with merge tables, the column names need to be known in advance.	Nate	<ul style="list-style-type: none"><li>• consider using CREATE TABLE FROM SELECT ... to create the results table.</li><li>• enable what we can for a moderately low-expense.</li></ul>
	database tagging in integration tests, desired for current multi-czar work in progress		<ul style="list-style-type: none"><li>• we will not modify existing unit tests for this</li><li>• we will add one or more tagged test cases to master (leaving untagged test cases as-is)</li><li>• we will hack the data loader to push to the master and all the czars</li><li>• when the czar boots it will pull down from the master</li></ul>

## Action items
