		• RFC-651 and RFC-652 will be flagged as soon as a documents are ready to review
		  ○ DMCCB will not be involved until the document to approve
		  ○ Colin Slater is not in favor of RFC-651
		• RFC-655 will probably be withdraw
		• RFC-656 no action
		• RFC-658
		  ○ John Swinbank this package is not of interest of the community, just internal
		  ○ It should not be a lsst_distrib
		  ○ this should be a deliverable to T&S
		  ○ It would be OK to add to the lsst_ci
		  ○ add the meta package to the Jenkins build like lsst_ts...
		    ☑ Tim Jenness to comment on the RFC-658 with the 2 alternatives
		• RFC-659
		  ○ The depreciation procedure should be updated. The proposal seems reasonable.

		• Tim Jenness updated the environment
		 ◦ the lsst_distrib works, but mathplotlib can't be updated
		 ◦ Tim Jenness lsst_sims is broken, need to be fixed
		 ◦ John Swinbank says this policy is not written, need to check with Andrew Connolly
		   ☑ John Swinbankto talk to Andrew Connolly on who updates sims
		 ◦ Wil O'Mullane we should ask Chuck, since sims is paid by commissioning team
		• 20.0.0 available end of May 2020
		 ◦ blockers to be done by the beginning of May
		 ◦ new functionalities?
		 ◦ John Swinbank releases are not tight to functionalities, but functionalities will be merged when ready
		 ◦ Wil O'Mullane which functionalities we need for commissioning at the end of the year? The May release should have enough of Gen3?
		 ◦ We can do the May release in any case, and then we do other minors or patch releases as required.
		• Potential 19.0.1:
		 ◦ it doesn't seem worth.
		   ▪ DM-22703 to be closed as won't fix

      and related discussion

| Monitor Jira issues status: | Support to J. Swinbank monitoring activity

From Previous week:

- ⚠ DM-6571 - Jira project doesn't exist or you don't have permission to view it.

  John Swinbank proposes to relate it to next release

- ⚠ DM-6602 - Jira project doesn't exist or you don't have permission to view it.

  John Swinbank proposes to close it as "won't fix", on the basis that LDM-472 is obsolete. We should also officially mark LDM-472 as obsolete. But we should discuss all this with Wil O'Mullane before doing so. | |

- DM-6571
  - just to be mentioned to the release note
    - ☑ John Swinbank block release 21 on dm-6571 and ensure there is an appropriate deprecating on release 20
- DM-6602
  - There should be an RFC to make LDM-472 obsolete
    - ☑ Wil O'Mullaneto look at LDM-472 to ensure it is really obsolete and open an RFC to mark it as obsolete
- DM-5000, DM-6146: Obsolete Won't Fix.
- DM-6632: Legit ticket, low priority, added comment.
- DM-6075: Implementation for RFC-183, which is incorrectly marked as done. Given that it's nearly four years old, and that we have to prioritize actually getting things working as opposed to polishing architecture, I (John Swinbank) don't think we should devote effort to this ticket. However, since the RFC was legitimately adopted, I don't think we can just close this. Added comment.
  - ☑ Kian-Tat Lim to assess DM-6075
- DM-5067: Obsolete; closed as Invalid.
- DM-6649: Nice idea, if we had lots of time. As it is, Won't Fix.
- DM-6386: We won't devote resources **just** to writing unit tests, although obviously we'll add them as appropriate during the course of development. Closing this as Won't Fix.
- DM-6659: This is an installation problem that is 3.5 years old, and hasn't seen further complaints. Closing this as Won't Fix until & unless it causes reproducible problems for somebody this decade.
- DM-6355: Probably still valid. Added a query to the ticket.
- DM-6664: Presumably still valid, but low priority. Added comment.
