- Community Pos Status and Discussion <https://community.lsst.org/t/science-pipeline-release-20-0-0-status-and-discussion/4126>

- 19.0.1
 - is blocked on a review from Adam
- 20.0.0
 - DM-24712 is blocking
 - if not fixed this week, we will need to wait before starting the release process
 - [John Swinbank](#) is relevant to block the release on an OSX Catalina, problem on tests? We should not block the release on this.
 - ✓ John Swinbank check if matplotlib can be removed from the unit test in order not to block the 20.0.0 release — *conclusion is that removing matplotlib would be "a big task"; prefer not to do so if at all possible.*
 - [Leanne Guy](#) suggests not to put plots in unit tests.
 - Other problems on the environment: mpich and requests for sims
 - ✓ Kian-Tat Lim find out what has to be done in order to fix the new scipipe-conda-env for 2.0.0 release (with BVan) and make a ticket

- 19.0.1
