

# DRP Metrics Monitoring 2021-03-01

Mondays 12pm - 12:50pm EST

Yusra's Zoom: <https://princeton.zoom.us/my/yusra>

## Attendees:

## Agenda:

- Review Action items from last week
- Review w\_2021\_06
  - What was noteworthy in this rerun?
    - It was a rough one. Filter problems with multiband. Memory problems with multiband which needed a config parameter to change in order to get it through. More filterName problems in pipe\_analysis. Took 3 weeks instead of 1 week.
    - Slurm issue appears to be there was an update in slurm versions in the most recent maintenance window.
    - Features: (scarlet and filter names)
    - Beware: 9813 uses a different config than 9697 and 9615. setSpectral=False.
  - What changed? Annotate
    - Investigate rho-stats an ellipticity resids in w\_2020\_06 post-Scarlet Arun Kannawadi Fred Moolekamp
    - Redefine what skyObjects and skySources mean when Scarlet is being used. Use flags to plot measurements on the parent? Fred Moolekamp Lauren MacArthur Lee Kelvin
  - What do we expect from w\_2021\_10?
    - New features:
      - Beware of: ticket that redefines isPrimary which might change metrics next rerun. maybe next
      - Native Gen3 rerun.
        - For hopes of parity (from upstream to downstream) we need to get the following in by Wednesday:
          - Read Calibs the same way in ISR between Gen2 and Gen3:

⚠️ DM-28985 - Jira project doesn't exist or you don't have permission to view it.

▪ PsfWcsSelectImagesTask: DM-20695 (Reviewed. Will merge today)

▪ Apply jointcal/FGCM during makeWarp: DM-17062 or DM-27613 (working today. Need quick review tomorrow)

▪ ForcedCcd ForcedCoadd: DM-19942

▪ TransformObjectTable: DM-22277 Is anything downstream of this ready?
    - What new metric can we expect next time
  - Review w04 DC2
  - AOB
    - The result of ci\_hsc\_gen2 TE1 didn't change when scarlet was added on 1/27. Because Scarlet is not on in processCcd. processCcd still uses the SDSS Deblender. validation\_data\_hsc/validate\_drp only runs validate\_drp.
