SAT Meeting 2014-10-14

Date

October 14, 2014 12:00-2:00 PDT

< previous (2014-09-23) | next (...) >

Attendees

Kian-Tat Lim	☑
Mario Juric	☑
Jacek Becla	☐
Unknown User (ciardi)	☐
Gregory Dubois-Felsmann	☑
Donald Petravick	☑
Frossie Economou	☑
Unknown User (rlambert)	☐
Robert Lupton	☑
Unknown User (xiuqin)	☑
Simon Krughoff	☑
Unknown User (robyn)	☑

Discussion Items

Item	Who	Notes

Action Request	KTL	⚠ DM-1056 - Jira project doesn't exist or you don't have permission to view it.

		• Robert: Should probably distribute DS9 for convenience.
		• Xiuqin: Most people should have it or can get it easily; don't take on responsibility for distribution.
		• Mario: Against *banning* distribution of optional packages.
		   ○ Packages not under `lsst_distrib` are not really under the stack.
		   ○ So no need for another server.
		• Modify policy to allow (but not mandate) distribution of optional packages as long as someone in DM is using it and will own and maintain it. Mechanism for claiming ownership to be determined.

Action Request	KTL	⚠ DM-934 - Jira project doesn't exist or you don't have permission to view it. ; with further updates, can this be un-recommended? • Recommend not using super unless you really know what you're doing (e.g. in limited, well-understood multiple inheritance hierarchies).
Discussion	KTL	How legalistic should the SAT be? • Should the SAT be approving/recommending fixed, exact texts and rules? Or just policies and statements of direction? • Frossie: Don't be very legalistic; trust people's judgement. • Gregory: Jeff needs to set expectations. • We do need to make sure that we record decisions adequately including rationale.
Design Deep Dive	KTL	⚠ DM-35 - Jira project doesn't exist or you don't have permission to view it. Alert Generation and Distribution • SAT members should look at these at least cursorily for major errors. • Organize a face-to-face at/around AAS?
Design Deep Dive	KTL	Data Release Production Overview
Design Deep Dive	KTL	⚠ DM-44 - Jira project doesn't exist or you don't have permission to view it. Archive Ingest and SDQA
NCSA Infrastructure	DonP	• Looking at OpenStack cluster, may need some assistance with configuration and use cases. • Will discuss offline with Frossie and Xiuqin.
