This was triggered by Paul who said "the plugin should be bsd" • K-T I don't see any problem with asking plugin writers to use GPL, but your example on the RFC wasn't convincing in itself. • K-T: Its a viral think that now you have to use BSD because all the BSD people want to use you. • TJ: If GPL won the world we wouldn't be having this convo. I think we need Wil to make a decision. DMCCB can say that we don't want to do it. • TJ: we at least have precedent in pex_config <p>JFB: I'll update 888 to reflect the discussion.</p> <p>RFC-890: Is the name appropriate for putting it up on pypi? JFB: I think its precise (its about relational algebra expression trees), but dont know if its generally meaningful to people.</p> <p>TJ: I'm recommending.</p>
