Discussion Items

Item	Who	Notes
Discussion	KTL	Package reorganization • Frossie and Mario came up with 9 categories of packages that keeps inter-category dependencies down. • Initially to be used as prefixes, later could morph into reorganized repos. • Frossie to send around proposal.

Discussion	KTL	GitHub transition
		
		• CCB has been notified of pilot.
		• Stash-to-GitHub is limiting factor; have technical ways forward on all issues.
		  ○ Using git-media for large files, backed on rsync store or S3; need `scons` to use git-media.
		    ■ Requires ruby, but available in all distros.
		  ○ Associating Stash PR comments with commits using git notes.

Discussion	DonP	NCSA infrastructure • Frossie sent some requirements. • Xiuqin to send some in near future after developer discussion. • Jacek sent some requirements; Frossie assumed Qserv integration tests in her requirements. • Goal is to finalize at DMLT face-to-face meeting.
Design Deep-Dives	KTL	Face-to-face planning • Considered doing during AAS meeting in Seattle. • Mario would like it postponed even more. • Add a day to the February DM meeting; allows new hires to attend as well.
Action Item	Frossie	⚠ DM-1203 - Jira project doesn't exist or you don't have permission to view it. • All production processes should log in UTC, in ISO8601 format. • Prototype on existing LSST cluster machine.
