° v24:

- 24.0.x Backport Status
- v24 Communit y post

n to vie w it. • 23.03 blocked on Colin's ticket

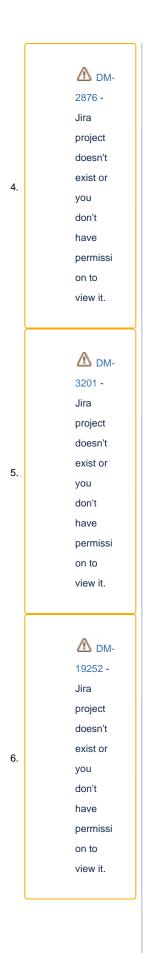

⚠ DM-37232 - Jira project doesn't exist or you don't have permission to view

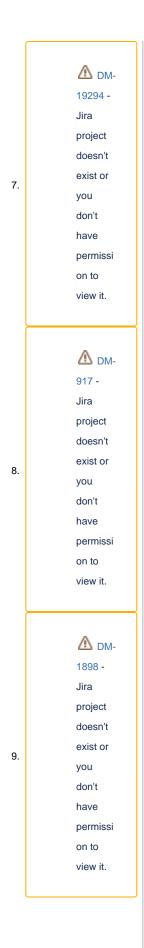

it.

- V24 back ports progressing but getting difficult because of drp_tasks which does not exist in v24.
 Agree to put the new task in pipe_tasks in the v24.1 release and announce that in future it will be in drp_tasks.
- V25 0 release candidate
 - characterization report ticket made but not complete.
 - Tags missing on ci packages and rc2_subset tutorial package. How do we automate those?
 - Mathias known feature. Needs to be manual tagged or retagged. Need to do a better audit on the ci packages. Can write a short code to do this.
 - o rc2_subset is never built.
 - O Does it have to do in lsst_w perhaps it can be built and included.
 - o ci_cpp not yet getting tags. Added correct team and will see if weekly tag appears tonight.
 - Mathias now understands these have not been tagged at all.
 - Tutorial needs to be updated to indicate people should clone the release tag and not main.
 - o how does ci_hsc get a weekly tag the weekly build is run of lsst_distrib and lsst_ci then git tags eups products all dm not dm_external, but dm_auxilaries perhaps ci has the wrong team ci_hsc is auxiliary .. ci_cpp and rc2_subset should have this team added.. it is on ci_cpp but it may have been done last week after build. rc2_subset is not correct and is in lsst-dm org (should be added to Mathias list manually tag retrospectiviely) ci_builder also not tagged and also in lsst-dm org on GitHub so is not tagged.
