LSST Database Hangout 2014-12-03

Date

03 Dec 2014

Attendees

- John Gates
- Fabrice Jammes
- Andy Salnikov
- Unknown User (danielw)
- Kian-Tat Lim
- Jacek Becla
- lurkers: John Swinbank, Simon Krughoff

Goals

- Get together, resolve bottlenecks, make progress faster, plan, design, exchange ideas

Discussion items

Discussed sprint 2014_11 for ~1 hour. Some worth capturing notes:

- need documentation how to install on multi-node
- docker - would be useful to experiment with, maybe in January

Action items

- move documentation about CSS structure from trac into readme file close to code - (Done, see DM-1620)
- add unit test to verify mismatched versions are caught (zoo structure and qserv). This is related to DM-1453. (Done, see DM-1621)
- add unit test for work in DM-1539. (Done, see DM-1622)
- file an issue: better docs how to create new package. (Done, see DM-1623)
- file a story: qserv should report it's version (scons should compile it into the code) (Done, see DM-1624)
- file a story: scisql should report it's version (Done, see DM-1625)
- building a release should be captured as a story (Done for Dec release, see DM-1626)
