Discussion items

DM-1842

- print just the length of buffer, not the contents

geom

- will try to finish before Feb 6 (cut off date for January PMCS report)
- put code in a dedicated (new) LSST module

1582

- Serge reviewing

1784

- mostly done

1611

- moved to Feb

swig issues on SL7

- scons detects if swig binary exists (incorrectly). Independent of path manipulation we do
- short term: install swig on in2p3 cluster. Fabrice will open (low priority) bug

1617

- mostly done through other tickets
- will be done in the next 1-2 days

branches in github's lsst/qserv

- a lot (both stale and active)
- deleting old branches? Ask at ahm
