Database Meeting 2015-11-04

Date

04 Nov 2015

Attendees

- Vaikunth Thukral, Andy Salnikov, Unknown User (npease), Serge Monkewitz, Brian Van Klaveren, Fritz Mueller, John Gates, Fabrice Jammes, Jacek Becla

Discussion items

Vaikunth looking into connection timeout in qserv

- might be worth checking off-the-shelf C++ tools that deal with connection pool

Docker

- useful to have source code inside container, so distribute qserv software with --noclean flag
- building two images: one for worker, one for master
- keep data in volumes, attach volumes to images
- manage credentials through volumes: default volume with dummy credentials, attach real credentials at runtime
- now worker container has all czar software and vice versa, should clean that in the future
