Science Pipelines Docs Meeting 2017-01-26

Date

26 Jan 2017

Attendees

- Unknown User (mssgill)
- Simon Krughoff
- John Swinbank
- Jonathan Sick

Goals

- Have prototypes ready for internal review by middle of next week

Discussion items

Item	Notes
procCcd	- Remove second para of intro - Insert python usage into page - Create separate API page for developers - Use 'entrypoint' vs. run - Use this ordering: - Intro - Config - Python usage - Cmd line usage - Examples - etc.
General	- Algorithm descrip -- we really want to know *how*, so we want *some* indication of what would go in, stick in warnings: we will put stuff in later! - We'll want links to papers or LDM-151 etc., ultimately
charImg	* Language for e.g. 'persist', and 'unpersist' -- want to provide users context of how they actually do this, use this Task
Other	Do all the TDL items left (examples, CL tasks, etc.)
