

RFC-215/RFC-229 Python Test File Naming & Non-executable Migration

This page tracks the implementation status of [RFC-215](#) and [RFC-229](#), which cover unit testing conventions in Python. As you work on a package, you can claim it in the table below. Once the package has been migrated on master, you can check it off. If your package isn't listed here, please add it to the table.

 [RFC-215](#) - Jira project doesn't exist or you don't have permission to view it.

This RFC states that Python unit test modules should not be executable (i.e. `./test_mymodule.py` shouldn't run, but of course `python test_mymodule.py` should run). To implement this RFC:

- 1. Remove the executable flag from Python test modules (e.g., `chmod -x ...`).
- 2. Remove the hash-bang line from Python test modules.

 [RFC-229](#) - Jira project doesn't exist or you don't have permission to view it.

This RFC states that Python unit test modules should be named with a `"test_"` prefix to enable automatic discovery by pytest. For example, `tests/testMyModule.py` should be renamed to `tests/test_myModule.py`.

This is documented in the [Python Unit Testing guide](#).

Status

Status	Package	Developer	Ticket
☒	afw	Krzysztof Findeisen	 DM-4639 - Jira project doesn't exist or you don't have permission to view it. (remove hash-bang)  DM-10542 - Jira project doesn't exist or you don't have permission to view it. (other changes)
