

# Fall 2017 QA Meeting: 2017-10-17

Present: [Lauren MacArthur](#), [Unknown User \(tmorton\)](#), [Sophie Reed](#), [Jim Bosch](#), [John Swinbank](#).

-  [DM-11452](#) - Jira project doesn't exist or you don't have permission to view it.

 is still in progress.
- This has been blocked by 

 [DM-12173](#) - Jira project doesn't exist or you don't have permission to view it.

, which proved to be more work than anticipated, but has resulted in substantial improvements to the codebase.
- After [DM-12173](#) is done, [DM-11452](#) should be an "easy" rebase on top of it.
-  [DM-11345](#) - Jira project doesn't exist or you don't have permission to view it.

 has not been started.
-  [DM-10859](#) - Jira project doesn't exist or you don't have permission to view it.

 was completed (per the criteria defined on [2017-09-27](#)) a couple of weeks ago, but not marked as done in JIRA. We can fix that today.
- Spatial binning of metrics (again, as per [2017-09-27](#)) was ticketed as 

 [DM-12071](#) - Jira project doesn't exist or you don't have permission to view it.

. This work has not been started.
- Per meeting of [2017-10-03](#), catalog matching in [Unknown User \(tmorton\)](#)'s scripts was treated as a priority. Work has started on this on 

 [DM-12251](#) - Jira project doesn't exist or you don't have permission to view it.

.
- Having this completed will be essential for calculating almost all of the metrics.
-  [DM-12038](#) - Jira project doesn't exist or you don't have permission to view it.

 was started, but more work remains. We agreed to reassign this issue to [Lauren MacArthur](#).
- Priorities for next week (in order):
  - [Lauren MacArthur](#): [DM-12173](#), [DM-11452](#), [DM-11345](#), [DM-12038](#). Then start thinking about how to actually implement some of the metrics we want to calculate if there's any spare time.
  - [Unknown User \(tmorton\)](#): [DM-12251](#), [DM-12071](#). Tim will be travelling, so will have only limited time.
