es

- Paul Domagala
- Gregory Dubois-Felsmann
- Igor Gaponenko
- Fabio Hernandez
- Simon Krughoff
- Kian-Tat Lim
- Fritz Mueller
- Xiuqin Wu

Goals

Discussion items

Key: AGENDA TOPICS, DISCUSSION, FOLLOWUP

Item	Who	Notes
Increase limits and swap space for qserv pdac	Unknown User (pdomagala)	ref. ⚠ IHS-488 - Jira project doesn't exist or you don't have permission to view it. It's proposed that we make the following changes to the PDAC qserv nodes: Swap space set to 10 time real system memory. Max user process set to 32,000. File descriptor limit 32,000. This was stalled awaiting answers to Andy's questions. Is this still needed? There seems to be some debate, especially about swap.
